Sustainable for Generations

The most environmentally friendly flooring available are authentic wood floors. Trees are a renewable resource and provide flooring that is sustainable for many generations. All Viking Hardwood Flooring products are made with raw material originating from sustainably managed forests.

Inspired by the restoration of historic city buildings, the Viking Modern Loft Collection blends innovative flooring technology with refined, sophisticated style. Each plank is crafted for exceptional stability, featuring advanced texturing, a designer color palette, and premium finishing techniques. Designed for today's active lifestyles, its curated warm, neutral tones create the perfect foundation for any living space.

**Please remember that one of the beautiful properties of wood is that it is a product of nature and natural variations in color and grain pattern are to be expected. These samples are provided to assist you with general color selection and appearance but will not show all the characteristics of the final installed product. Multiple sample boards or a full carton of material will give you a more accurate representation.*
