Sustainable for Generations

The most environmentally friendly flooring available are authentic wood floors. Trees are a renewable resource and provide flooring that is sustainable for many generations. All Viking Hardwood Flooring products are made with raw material originating from sustainably managed forests.

Inspired by the restoration of historic city buildings, our Modern Loft Collection combines modern flooring ingenuity with sophisticated styling. Your floors will look beautiful while also performing to meet the demands of today's active lifestyle.

With a selection of twenty different colors and styles in our Modern Loft Collection, you are sure to find the perfect floor for your living space.

* Please remember that one of the beautiful properties of wood is that it is a product of nature and natural variations in color and grain pattern are to be expected. These color swatches are provided to assist you with general color selection and appearance but will not show all the characteristics of the final installed product. Multiple sample boards or a full carton of material will give you a more accurate representation.
